

## THE SMALLEST 130 LUMENS EVER

With a compact body that's shorter than an AAA battery and slimmer than a pinky finger, the I1R reaches a monumental 130 lumens of brightness.

## I1R EOS

The I1R features a built-in rechargeable Li-ion battery that charges through a Micro-USB port when the light head is unscrewed and removed. It utilizes a Philips LUXEON TX LED paired with a TIR optic lens producing a soft and balanced beam. Changing outputs is simple just by twisting the light head. The I1R EOS is the perfect daily carry keychain flashlight with high output, convenient charging, and easy mode changing.

## CONVENIENT CHARGING

The I1R is rechargeable through a built-in Micro-USB charging port which is accessed by removing the head of the flashlight.
