SUNCASE: Solar Lighter

How does it work?

1. Open the wings at maximum
2. Insert object to burn at 2mm
3. Face the sun

Solar lighter, to experiment the power of the sun. Facing the sun, the two parabolic mirrors focus the rays at the focal point of ignition. Immediately, it lights everything : wood, paper, tobacco, incense ...

Its Lighter Case option offers the dual-energy experience and makes it an essential tool to keep in your pocket : solar & gas / use it 24/24. SUNCASE democratizes the knowledge and use of solar energy...

Waterproof, windproof and ultralight (12 gr), the Suncase is the new solar tool to carry
